

Accessing Schoology Directly as a Parent

Establish your username and password

1. Your username is the username from the parent portal with p_ added to the front
 - a. gwelker becomes p_gwelker
2. Your password is the password from the parent portal.

Access the parent URL for Schoology.

Parents have accounts that are different from staff and students. This is important because parent accounts will authenticate at Schoology.

- Parent accounts reside at Schoology
- Student and staff accounts reside locally on our network in Active Directory

You will need to click on the following link any time you need to access Schoology as a parent. Adding this to your bookmarks is recommended.

<https://schoology.granvilleschools.org/login>

If you type in schoology.granvilleschools.org manually it will take you to a different URL that will only work for staff and students.

Notes

- The password and username updates once a day in the late evening in Schoology. This information is pulled from the parent portal.
